E-mail address/es	karima78@rediffmail.com, karimashaikh78@gmail.com
Experience:	15 years of academic teaching and research
Brief account of research interests	Research work engaged in at present:
	Carbon nanotubes
	Polysaccharide based drug delivery system
	• Formation and evaluation of derivatised polysaccharides and other
	polymers for pharmaceutical use.
	Development of formulations of medicines based on Ayurveda and Unani
	Nanosponge drug delivery systems
	Nanotechnological drug delivery systems for arthritis
	Nanotechnological drug delivery systems for ovarian cancer
	Expertise:
	a. Nanotechnological systems for anticancer therapeutics.
	b. Development of nano drug delivery systems for phytopharmaceuticals such
	as Andrographolide, Fisetin, Plumbagin etc.
	c. Development of novel drug delivery systems such as liposomes, niosomes,
	ethosomes, nanoparticles, nano composites, long circulating modalities, Pickering
	emulsions, self nano emulsifying system
